## **EDM NOTCH MASTER™ Electric Discharge Machining**

Scan Systems Corporation, through its operating division of EDM SPECIALTIES, manufactures the family of portable EDM Notch Master™. Originally designed as the answer to producing flaws on the inside diameter of pipe, the scope of the equipment has enlarged. Continuous improvements have made the EDM Notch Master™ valuable to any industry that is required to make calibration standards. Not just limited to pipe, the Notch Master™ is used for coiled metal products, forged products, specialty metal products, and manufacturing processes.

The EDM Notch Master™ is now in its fourth generation of equipment. Current Notch Master™ equipment includes the EDM Notch Master™ 301mr and the EDM Notch Master™ 201m
